

WORLD'S FASTEST DENTAL 3D PRINTER

World's Fastest Dental Printing Solutions

WORLD RECORD SPEED
6 full arches in 5 minutes

STATE-OF-ART ACCURACY
 $\pm 50\mu\text{m}$, up to 95.05%
 $\pm 100\mu\text{m}$, up to 99.6%

OPEN MATERIAL SYSTEM
100+ dental resin compatible

UNIZ TECHNOLOGY LLC

www.uniz.com

sales@uniz.com

9400 Activity Rd Ste L

San Diego, CA 92126, US

Key Features

Patented efficiency liquid-cooling system
Maintain printing temperature below 40°C

Patented low force stereo peeling technology
Micro–stereo composite peeling structures

Patented high power collimated light source
16 mW/cm² high power density, 95% uniformity

Resin temperature control system
Maintain optimal reaction temperature

Technical Specification

DESCRIPTION		SPECIFICATION
PERFORMANCE	Printing Technology	LCD Stereo Lithography
	Build Volume	192 × 120 × 180 mm 7.5" × 4.7" × 7.1"
	XY Resolution	49.8 μm
	Maximum Accuracy*	±20 μm
	Layer Thickness (Z Resolution)	10~200 μm (50, 100 μm recommended)
	Separation Mechanism	Micro–stereo composite peeling structures
	Support	Uniz smart support technology
	Printing Speed**	6 full arches in 5 minutes
STRUCTURAL	Dimension / Weight	380 × 380 × 1230 mm [W×L×H] 15" × 15" × 49" 60 KG/132 LB
	Dimension/Weight (Including packaging)	490 × 490 × 1300 mm [W×L×H] 20" × 20" × 51" 65 KG/144 LB
	Operating Temperature	18~28° C (64~82° F)
	Power Requirement	110V/60Hz 6A 220V/50Hz 3A
	Optical System	4th Generation Collimated Light Source
	Mechanical	Cast Aluminum & CNC, Sheet Metal
	Connectivity	USB Flash Drive, Wi-Fi, Ethernet
	Control Pannel	7” Touch Screen
SOFTWARE	System Requirement	Windows 10 and up (64–bit only) Mac OS X 11.4 and up (64–bit only) 16GB RAM, OpenGL 2.1, Discrete Graphics
	Advanced Features	Built–in Advanced Model Repair, Dentist and Technician Friendly, Ultra Large File Support (1GB+)
	Slice Format	ZSLR
	Compatible Format	STL, OBJ, AMF, 3MF

* The indicators are obtained with specific testing models and may vary among different ones.
** Speed achieved with 6 standard aligner models sliced at 100 microns.

State-of-art Accuracy

3D scans of full-arch models printed on NBEE show over 99.6% conformity within 100 microns and 95.05% conformity within 50 microns.

UNIZ DENTAL Design and Slicing Software

Scan to Model

Convert 3D intraoral scans directly into printable dental models, simplifying your dental workflows.

Auto Layout

Smarter layout algorithm that helps you arrange multiple models more easily and maximize the platform utilization.

Easy Connectivity

Ethernet, Wi-Fi and USB connectivities.

Automatic Supports

Smart automatic support-generation algorithms with powerful manual options.

Open Material System

Open access to extensive third-party resins.

In-depth Integration with Leading Design Software

Reviews from Professionals

Dr. Ludwig

- Assistant Professor at the University of Homburg / Saar, Department of Orthodontics.
- The editor in chief of the Quintessenz publication "Kieferorthopädie" (Orthodontics).

NBEE is the winner in matter of speed

“ I guess the NBEE is the winner in matter of speed, and my expert on this = Christian, as well. ”

Dr. Brenes

- USA Top100 doctors 2022
- Professor at Medical University of South Carolina
- Founder of Digital Dentistry Education

NBEE meets dental practice's need

- “ After a few months of using the NBEE 3D printer by Uniz; here are some of the key points of the evaluation; the complete eval will be in the online course.
1. Very easy to use hardware and software. Huge build plate to fit about 5-6 models horizontally and about 24 vertically.
 2. The printer is big but is very fast, faster than slash.
 3. The surface finish is quite good compare to many other printers.
 4. More ideal for labs due to its size; more limited resins but the company is incorporating many resins in the next few months- open architecture is my thing.
 5. Truly plug and play with built in Wi-Fi or Ethernet.
 6. Built in touch screen and heater. ”

Dr. Kim

- Director of Clinical Development Research Institute

Graphy resins perform well on NBEE

“ We have been busy doing validation work with several resins on NBEE and have had great success. The parts look great, and the speed is impressive. We would really like to show you our results and how we can help create good resin partnerships with our resin partners to quickly boost visibility and sales. ”

Barbara

- Director of Laboratory Operations

NBEE revolutionizes dentistry practice

“ 3D printing is revolutionizing the practice of dentistry. Not only can procedures that once took weeks, now take just hours with chair-side production of dental models and surgical guides, but putting local dentists in full control of their patient-specific products – including night guards, temporary crowns, and dentures – means that there's fewer appointments needed, vastly lowered costs, and improved patient care. ”

Trusted by Digital Dentistry Leaders

We are maintaining and extending trusting relationships with our partners worldwide, and focusing on providing most efficient solutions and best quality.
